# GitHub report

Samil: 22 commit & Pull

Mathieu: 20 commit & Pull

Donovan: 17 commit & Pull

Tristan: 16 commit & Pull

This is all the branch of our GitHub

We can see the beginning which is disrupt and disorganize but the following commits are clear.

We have created some time an another branch. His purpose is to work together on the same file and after all the modification we can merge them.

The commits on the master branch are the original JPUBlankProject.

For the repartition,

Tristan have made almost all the model part and the unit test

Donovan have made a lot of the controller and has done most of the documentation commentary

Samil have organize the project on a maven way and have done a lot with the diagram stuff and the database

And Mathieu have made de view part and a bit of the controller part
